

## Saija Finance Private Limited

Instrument	Amount	Rating Action
Bank lines	Rs. 100.0 crore (enhanced from Rs. 50 Crore.)	[ICRA]BBB- (Stable) reaffirmed/ assigned

ICRA has reaffirmed rating of [ICRA]BBB- (pronounced ICRA triple B minus) to the Rs. 100 crore<sup>1</sup> (enhanced from Rs. 50 crs.) bank lines of Saija Finance Private Limited (Saija)<sup>2</sup>. ICRA also has a rating outstanding of [ICRA]BBB- (pronounced ICRA triple B minus) for Rs. 15 crore non convertible debenture and Rs. 20 crore senior unsecured NCD of Saija<sup>2</sup>. The outlook on the long term rating is Stable.

The rating factors in Saija's ability to scale up operations (portfolio of Rs. 216 crore<sup>3</sup> as on March 31, 2016), largely through expansion in client base (53% growth in FY16) and branch network (39% growth in FY16), while the growth in average portfolio per member has been 16%. ICRA also notes improved financial flexibility for Saija with number of lenders increasing from 13 lenders (as on March 31, 2015) to 16 lenders (as on February 29, 2016). Saija's asset quality remains comfortable, notwithstanding the deterioration (0+ delinquencies of 0.77% as on March 31, 2016 vs. 0.38% as on June 30, 2015, including death cases) and has been factored in while assigning/ reaffirming the rating. The rating continues to factor in Saija's experienced management team, good investor profile (Accion International holds 40.61% and Pragati India Fund Limited holds 34.28% stake in the company) and its good loan origination and monitoring systems.

Saija's rating is however constrained by high geographical concentration risks (81% of portfolio in Bihar and top 10 districts accounting for 87% of the portfolio as on Feb-16) and sharp deterioration in capitalisation indicators (managed gearing of 8.8 times as on Mar-16 vs. 5.4 times as on March 31, 2015) as the pace of growth was higher than external capital infusion and internal capital generation. ICRA has however noted that the reported capital adequacy remains adequate (CRAR of 21.40%, Tier 1: 12.79%; both as on Mar-16) and that the company is in various stages of tying up around Rs. 30-40 crore of capital which would help the company to grow for the next 4-6 months, post which the company would go for another round of capital raising. Over the medium term, the company plans to grow at a CAGR of 100-110% (owing to a moderate base as on Mar-16) and would need to raise additional equity capital of around Rs 180-220 crore over the next three years and tie up funding sources to meet its growth plans. The company intends to reduce the concentration risk by bringing down the share of portfolio in Bihar to 65%-70% by March 31, 2017 by increasing presence in the states of Jharkhand and Eastern UP. The rating also factors in Saija's moderate profitability (RoE of 7.2% during FY16) indicators, dependence on wholesale and high cost funding sources and lack of diversity in earnings. ICRA has also noted Saija's high pace of growth (growth of 77% in FY16 and 3 year CAGR of 107%) and relatively high attrition rates for the industry. In ICRA's opinion, ability of the company to manage growth and asset quality while expanding into newer states as well as newer products (SME loans) and maintaining prudent leveraging levels would be critical from a rating perspective.

The rating also factors in the risks associated with unsecured lending business, political risks, and operational risks arising out of cash handling, along with challenges associated with high pace of growth and high attrition rates. While access to credit bureaus and regulatory ceiling on borrower indebtedness has reduced concerns on overleveraging and multiple lending, however, issues related to multiple identity proofs as well as gaps in information available with the bureaus (lack of data related to the SHG programme, non NBFC-MFIs, lending through business correspondent model) remain. Given the rising competition in this segment with various MFIs growing at a rapid pace as well as with new entrants especially through the Business Correspondent model, MFIs would need to carefully assess the debt repayment capacity of borrowers so as to limit the risk of overleveraging and the consequent threat to their portfolio credit quality. Nevertheless ICRA takes note of the efforts at an industry level to alleviate these concerns through standardization of KYC documents, digitization of SHG programme so as to assess the actual leveraging status of the borrower as well as the lower debt limit prescribed by MFIN.

<sup>1</sup> 100 lakh = 1 crore = 10 million

<sup>3</sup> Including securitized/ assigned book

Though the company has diversified its funding mix, around 49%<sup>4</sup> of its funding was met through NBFCs/Financial Institutions at relatively higher cost of funds (around 16%). Saija would require larger lines from banks at competitive rates to reach the planned scale of operations. ICRA has also noted that the company has raised debt in the form of Non Convertible Debentures which include covenants linked to various financial parameters (such as portfolio quality, gearing, etc.) and breach of these could lead to accelerated repayment. Saija is committed to reduce the proportion of such borrowings to manageable levels over next 12 months; reduction in proportion of such debt would have critical bearing on the credit profile of Saija. The company plans to continue tapping other debt market funding sources (for long term funds). As for liquidity, Saija has a comfortable profile due to well matched maturity of assets and liabilities, however regular flow of funds would be crucial to grow its portfolio at the planned pace.

As for profitability, while the interest spreads of the company were around 10%, relatively high operating expenses (operating expenditure/ avg. managed advances at 9.9% during FY16 vs. 11.2% during FY15), led to low profitability indicators for the company (ROE of 7.2% in FY16). Saija has recently reduced its interest rates to 25.98% from 26.26% earlier, which could impact its profitability going forward. However, over the next 18 months, with the scale up of operations and implementation of hub and spoke model by the company where each branch would service 3-4 hub locations, breakeven of the new branches; operating expenses are likely to moderate to 8.5% – 9% and hence ICRA expects Saija to report ROEs of 7%-9% over that period.

### Company Profile

Saija Finance Private Limited (Saija) is an NBFC MFI that started its microfinance operations in November 2007 but as a programme under Saija Vikas, a society formed in July 2007 by the promoters – Mr. S.R Sinha and his wife, Mrs. Rashmi Sinha. The NBFC, Saija Finance Private Limited was formed in April 2008 and was granted the NBFC-MFI license in December, 2013 by RBI. The company follows the Grameen Model of lending. Saija offers two types of JLG loans —business purposes and Saija Mahila Rin (group loans to women; ~90% of total portfolio as on February 2016) and Saija Karobar Rin (group loans to men or women; constituting ~10% of total portfolio as on February 2016). Saija reported a net profit of Rs. 2.32 crore during FY16 on a managed asset base of 320 crore vis-à-vis net profit of Rs. 1.0 crore on a managed asset base of Rs. 211 crore during FY15. The company reported a CRAR of 21.40% (Tier I of 12.79%) as on Mar-16.
